

Dedicated to the Aviation Professionals that
Design, Engineer, Repair, Alter, Maintain, and Certify Aircraft and Related Products

FAA Certified Repair Stations "Human Factors for Repair Stations:"

STAMINA Core Course FAA Accepted*

Airworthiness Standards Institute

0800 – 1700 Tuesday – Thursday – August 17 - 19, 2010

Boca Raton, Florida

Springhill Suites
5130 NW 8th Avenue
Boca Raton, Florida 33487

FAA certificated Repair Station Accountable Managers, Supervisors, Quality Inspection Personnel Technicians and Trainers interested in gaining knowledge and practical experience in human factors in the aviation maintenance environment should attend. The seminar will focus on all elements of human factors training, including introduction to human factors, statistics, safety culture, organizational factors, human error, tasks and errors, human reliability, human performance limitations, vision, hearing, stress, situational awareness, and workload management. A course outline along with workbooks will be provided to all attendees. * This course meets the minimum requirements of 14 CFR § 65.93(a)(4) for Inspection Authorization (IA) renewal**. This course is the foundation for an effective organizational safety management system and meets the guidance recommendations as outlined in AC 145-10 & EASA* MIP-G concerning human factors. This is the same course provided by the JAA for EASA member organizations. *EASA requirements include module 10 which addresses the establishment of a human factors program within the organization, if you have an established human factors program we can incorporate training for that on an individual basis.

** For IA renewal the course will conclude at 1700 on Friday, for others the course will conclude at 1500.

Schedule

The 3 day Seminar shall commence at 0800 and end at 1700. This course is highly interactive and includes group exercises, individual exercises, Games, Videos, Group discussions, Role Plays, and Presentations. A course completion certificate will be distributed at the end of the course. This course meets the pre-requisite requirements for the Stamina Train-the-Trainers Course established by the Aerospace Psychology Research Group of Trinity College – Dublin. Prerequisite course for the STAMINA "Train the Trainers" Course
